Manitoba Ag-Weather Program

Percentage of Normal
Corn Heat Units

May 1 - June 15, 2014

All graphics are interpolated from data collected from the Manitoba Agriculture, Food and Rural Development (MAFRD) Ag-Weather Program and Environment Canada weather stations that has been quality controlled for accuracy. Locations depicted on the graphic have complete records for the valid time period and locations may be removed or added throughout the growing season. The MAFRD Ag-Weather program is funded through the “Growing Forward 2” initiative.
